INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/009839

| Box No. V | Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement | | |
|---|---|------------|-----|
| 1. Statement | | | |
| Novelty (N) | Claims | <u>1-8</u> | YES |
| | Claims | | NO |
| Inventive step (IS) | Claims | <u>1-8</u> | YES |
| | Claims | | NO |
| Industrial applicability (IA) | Claims | <u>1-8</u> | YES |
| | Claims | | NO |
| 2. Citations and explanations (Rule 70.7) | | | |
| 1. Reference is made to the following documents: | | | |
| D1: US-A-4 173 385 (FENN JOHN W ET AL) 6 November 1979 (1979-11-06). | | | |
| 2.1 Document D1 is the prior art closest to the subject matter of <u>claims 1 and 6</u> . Said document discloses (the references in parentheses are to document D1): | | | |
| a single-pole coaxial cable, comprising | | | |
| a core; | | | |
| a dielectric surrounding the core; | | | |
| an electroconductive shield surrounding the dielectric; | | | |
| a sheath surrounding the shield; | | | |
| a connector with a contact sleeve, one section of the sleeve being in electroconductive contact with the shield, and | | | |
| said contact sleeve being so arranged that the contacting section thereof surrounds the dielectric as well as being surrounded by | | | |

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

the shield, and the inner surface of the dielectric being inserted in such a way that the sheath is also expanded in the region of the first section; and

a method for the production of a single-pole coaxial cable of this type by inserting a contact sleeve in an axially parallel direction between the shield and the dielectric.

- 2.2 Thus, the subject matter of claims 1 and 6 differs from the known coaxial cable in that the shield of the coaxial cable comprises a braided metal and an electroconductive foil and in that the contact sleeve is connected to the sheath of the coaxial cable by the extrusion of insulating material, not by mechanical means.

The subject matter of claims 1 and 6 is therefore novel (PCT Article 33(2)).

- 2.3 The problem addressed by the present invention can consequently be regarded as that of devising a secure mechanical connection between a contact sleeve and a single-pole coaxial cable which comprises a shield with a braided metal and an electroconductive foil.

- 2.4 The solution to the above problem, as proposed in claim 1 or 6 of the present application, involves

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

an inventive step (PCT Article 33(3)) since none of the prior art citations describes or mentions connecting a similar single-pole coaxial cable to a contact sleeve in this manner.

2.5 Claims 2 to 5, 7 and 8 are dependent on claims 1 or 6, respectively, and thus, likewise, satisfy the requirements of the PCT in respect of novelty and inventive step.
